Earth and Space Sciences: Humans and Earth Questions for Understanding

1. Ocean corals make habitats for other animals to live in. How can humans make habitats for animals?

2. Birds build nests by reusing natural items they find. How can humans use natural items or reused items when building homes?

3. Name three ways people pollute Earth. Come up with three ways that pollution can be reduced.

4. Think about items you use every day. Name three items that you could reuse or recycle.

Supports and Develops:

Science and Engineering Practices: Constructing Explanations (for Science) and Designing Solutions (for Engineering) (6).

Performance Expectation K-ESS3-3: Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.
